

TRAN QUOC DUY KHOI

JAVA BACKEND DEVELOPER INTERN

Phone: 0929648427 | Email: tranquocduykhoid@gmail.com | Availability: Full-time Internship

GitHub: github.com/DuyKhoi282 | Portfolio: duykhoid-portfolio.netlify.app

CAREER OBJECTIVE

To develop my career as a Java Backend Developer by improving my Java, Spring Framework, database, and backend development skills. Seeking a full-time internship to gain practical experience, strengthen problem-solving abilities, and contribute to real-world software projects.

EDUCATION

University of Economics and Finance (UEF)

Expected Graduation: 2027

Bachelor of Information Technology | Final-year student

TECHNICAL SKILLS

- **Programming Languages:** Java, C#
- **Backend & Web:** Spring MVC, Spring Boot (Basic), JSP & Servlet
- **Architecture & Development:** MVC Architecture, Layered Architecture, Database Design, CRUD Operations
- **Databases:** MySQL, SQL Server, SQL Queries
- **Tools:** Maven, Git & GitHub

ACADEMIC PROJECTS

Travel Tour Booking System

Academic Group Project

Role: Booking & Payment Module | **Tech Stack:** Java, Spring MVC, JSP, Servlet, MySQL, Maven

GitHub: <https://github.com/vannld23/travel-tour-booking-system>

- Implemented booking creation, booking history tracking, and booking status management.
- Applied MVC layered architecture using Controller, Service, DAO, and Model layers.
- Implemented booking status flow: Pending, Confirmed, Completed, and Cancelled.
- Managed booking and payment-related data using MySQL.
- The payment module handles payment records only; no external payment gateway was integrated.

Restaurant Management App

Academic Group Project

Role: Database Design & Menu Management Module | **Tech Stack:** C#, WinForms, SQL Server, ADO.NET

GitHub: <https://github.com/DuyKhoi282/Restaurant-App>

- Designed the SQL Server database schema, defining primary/foreign key constraints and test datasets.
- Developed the Menu Management module with full CRUD operations for food items and food categories.
- Applied parameterized SQL queries to prevent SQL Injection and collation search for accent-insensitive filtering.
- Implemented safe-deletion business logic checking unpaid orders to preserve relational data integrity.

CERTIFICATIONS & LANGUAGES

- **English Proficiency:** VSTEP Level 7.0 (2026) | IELTS Overall Band Score 5.5 (2022)

ACHIEVEMENTS

- **Consolation Prize - Cybernet Competition 2025**

University of Economics and Finance (UEF)
